

WHO (World Health Organization) Sneak Attack Sources for the Video

Part of the Series:
Source PDFs for Global Coup Related Topics

Roger Golden Brown
January 19, 2023

Find this and more Source PDFs for Global Coup Related Topics on [their website page](#).
Other Global Coup Related PDFs can be found and downloaded [here on my website](#).

Preface

This and other “source” documents will differ from my PDFs that cover topics with more narrative, quotes from sources, and linked footnotes. The intention is for these source documents to be easy to explore, having a bare minimum of editorial comment.

Some of the sources themselves contain supposedly documented information. As always don't take my or anybody's word for anything outright. Realize your own agency and recognize that trust in information can be nuanced.

Finally, these source documents will likely be updated from time to time as I find more sources. Check back for newer versions.

WHO (World Health Organization) Sneak Attack

This document is the companion document to a video interview originally on CHD (Children's Health Defense) TV, January 14, 2023 by Meryl Nass with James Corbett about the wheels that are already well in motion inside the WHO to consolidate a world-wide health policy with them dictating the response to health issues for the planet.

Find the video here: [WHO \(World Health Organization\) Sneak Attack](#)

Find James's page of links here: [Interview 1779 - WHO Sneak Attack on CHD TV](#)

Also check out a previous CHD TV Interview of James Corbett with Meryl Nass from December 18, 2022: [The Weaponization of the WHO on CHD TV](#)

Thanks to James Corbett first of all for all the great work he is doing and has done and likewise to Meryl Nass. Also thanks to James for his show notes, from which I

compiled this document, expanding on some with more links hopefully to better seduce people who liked the video into checking out the sources for a more complete picture.

Each of James' links is bullet pointed. Text that is indented is excerpted from the linked-to source. Find sources that interest you and check them out.

The video's blurb from the Children's Health Defense:

This is the big one. They're going for broke... I think we may only have potentially until May before one or both of these documents gets voted on" — Meryl Nass, M.D. and James Corbett continue their discussion on the WHO's proposed International Health Regulation Amendments + potentially legally-binding 'Zero Draft Treaty' currently being drawn up in secret meetings behind closed doors. As the WHO touts the solution to worldly problems as possible through their 'One Health' approach — one wonders if a world in which humans, animals, agriculture, and weather are dominated by state depicted notions of the highest attainable standard of 'health' may secretly be a trojan horse to dominate as much of the sovereign world as possible — usurping power from individual countries and thrusting it into the hands of a mad-with-power agency which seeks to control Earth's resources, ecosystems, food, animals, and plants.

WHO Sneak Attack

- [WHO Member States Agree To Develop Zero Draft Of Legally Binding Pandemic Accord In Early 2023](#)

From the web page:

7 December 2022,

Countries meet for three days to agree next steps toward historic legal instrument, rooted in the WHO Constitution, designed to protect world from future pandemics.

During discussions, Member States call for global agreement that takes into account equity, promotes preparedness, ensures solidarity and respects sovereignty.

Zero draft of the pandemic accord to be ready for negotiations by Member States starting February 2023.

Find also on that page a link to the [Intergovernmental Negotiating Body](#):

In December 2021, at its second-ever special session, the World Health Assembly established an intergovernmental negotiating body (INB) to draft

and negotiate a convention, agreement or other international instrument under the Constitution of the World Health Organization to strengthen pandemic prevention, preparedness and response. The INB's work is based on the principles of inclusiveness, transparency, efficiency, Member State leadership and consensus.

- [Conceptual Zero Draft For The Consideration Of The Intergovernmental Negotiating Body At Its Third Meeting](#), November 25, 2022, 32 page PDF.

The PDF has a nice clickable table of contents on page 4. Below I will comment on a random few items. But don't trust my interpretations. Check it out for yourself.

Article 4. Principles

Item number 3, referring to the language of the Charter of the United Nations says (my highlight in italics):

Sovereignty – States have, in accordance with the Charter of the United Nations and the principles of international law, the sovereign right to determine and manage their approach to public health, notably pandemic prevention, preparedness, response and recovery of health systems pursuant to their own policies and legislation *provided that activities within their jurisdiction or control do not cause damage to other States and their peoples.*

Article 24. Withdrawal

This section says a party to the agreement can only file for withdrawal after minimum 2 years and then can withdraw one year later; in other words it takes a minimum of 3 years to get out of the treaty.

Article 26. Amendments to the WHO CA+

This section says amendments to the agreement can be passed by 2/3 majority. This means those not in favor of an amendment will be party to something they don't agree with for at least 3 more years.

Article 16. Strengthening pandemic and public health literacy

This section is all about the efforts at propagandizing their population expected of countries who are party to the agreement. Media "literacy" is needed to avoid mis- and dis-information.

Several items from the section:

Towards this end, each Party [shall]/[should]:

(a) Inform the public, communicate risk and manage infodemics through effective channels, including social media;

(b) Conduct regular social media analysis to identify and understand misinformation, and design communications and messaging to the public to counteract misinformation, disinformation and false news;

(f) Strengthen research into the behavioural barriers and drivers of adherence to public health measures, confidence and uptake of vaccines, use of therapeutics and trust in science and government institutions.

Article 17. One Health

This section refers to urging parties to "Promote and implement a One Health approach" which presumably refers to the One Health concept as described further down. From that section:

Towards this end, each Party [shall]/[should]:

(g) Strengthen synergies with other existing relevant instruments which address the drivers of pandemics, such as climate change, biodiversity loss, ecosystem degradation and increased risks at the animal-human-environment interface due to human activities;

- [Review Committee Regarding Amendments To The International Health Regulations \(2005\)](#)

This Review Committee will function in accordance with the [WHO Regulations for Expert Advisory Panels and Committees](#), and will provide its report to the WHO Director-General no later than mid-January 2023.

The sole purpose of this Review Committee is to provide technical recommendations to the Director-General on amendments proposed by State Parties to the IHR.

- [Report Of The Fifth Meeting Of The Review Committee Regarding Amendments To The International Health Regulations \(2005\) \(IHR\)](#)

This is a 6 page PDF about the 2005 meeting.

- [One Health Basics](#)

This page gives a brief description of One Health. (Extensive PDF linked to below)

- [CDC's One Health Office: What We Do](#)

From the page:

The [Global Health Security Agenda](#) (GHSA) is an effort by nations, international organizations, and civil society to accelerate progress toward a world safe and secure from infectious disease threats.

- [One Health Joint Plan Of Action Launched And Presented By WHO And The Quadripartite Partners](#)

This is December 23, 2022 Departmental news about the WHO's One Health Initiative.

- [One Health Joint Plan Of Action Launched To Address Health Threats To Humans, Animals, Plants And Environment](#)

This is an October 17, 2022 News release. The page has a link to the October 14, 2022 page Overview of: [One health joint plan of action \(2022-2026\): working together for the health of humans, animals, plants and the environment](#), where there's a link to the PDF.

This is an extensive 86 page PDF covering many aspects of yet another approach to top down global tending of the planet. The first of 6 objectives noted on page xi:

i. Provide adequate guidance and tools for the effective implementation of multisectoral approaches to promote the health of humans, animals, plants and ecosystems and to prevent and manage risks at the human–animal–plant– environment interface.

Note this on page 14, a list of One Health projects:

The OH JPA Builds and Compliment Existing and Ongoing Initiatives:

Many can be downloaded as PDFs. Note one called: [WHO Global Strategy for Food Safety \(2022-2030\)](#). Doing a search for the word "organic", it is only used once in the 86 pages:

Shifts in consumer preferences, purchasing trends and expectations are rapidly changing the production and distribution of certain foods (e.g. demand in some populations for organic, fresh and less processed foods and demand for alternative protein sources).

- [Please Stop The Ride To A Biotech Food Takeover – Transcript](#)

From the transcript, originally posted June 2019, on the Stop the Ride website:

Are you aware of the drastic changes that have been happening in the food system?

Some of you may recall that I was here at this event [last year](#), warning that these products were coming.

They are sequencing all of the life and then they can apply things like computational protein design, machine learning, to mix and match to build whatever products they want.

And these techniques are being applied to produce food ingredients, flavors, cosmetic ingredients, supplements, industrial chemicals, pharmaceuticals, and more.

- [Biodigital Today And Tomorrow](#) - James' link to an archive of the PDF.

Here it is on the Policy Horizons Canada website: [Biodigital Today And Tomorrow](#)

From the PDF:

Biological and digital systems are coming together in profound ways, creating a new domain called the biodigital. Digital technology and living things are increasingly able to communicate with each other. We can embed digital technology into living organisms, and incorporate biological components into new technologies. Genetic modification of the natural world for climate change mitigation, environmental remediation, and biodiversity conservation may however raise ethical considerations.

The contours of the coming biodigital era are becoming clearer. This report explores change drivers and how biodigital convergence could transform five economic sectors and areas of life.

- [9/11 War Games](#)

Link to the video on James' website, including the transcript.

- [James Roguski Substack — THE TOP 100 REASONS TO #StopTheTreaty, #StopTheAmendments, And #ExitTheWHO.](#)

Also find the above page of 100 REASONS in PDF format on my Quasar website: [The Top 100 REASONS to #StopTheTreaty, #StopTheAmendments, and #ExitTheWHO](#)

James Roguski has been doing incredible work following the WHO's quest for a comprehensive global treaty putting them in the driver's seat.

Also check out a video on my Quasar BitChute channel of James Roguski interviewed by Sarah Westall, December 9th, 2022: [WHO Holds Week Long Secret Meetings for New Amendments NWO Agenda Continues w James Roguski](#)

This is mega important. As James expressed, they will likely not wait until 2024 to seal the deal. Or maybe a health "emergency" will force it's approval.

Please share this with all your friends. Especially with anyone who is as of yet not aware of the Global Coup underway.
