

Sam Bailey *Germ Theory* Videos' Show Notes

Compiled and prepared for PDF format by Roger Golden Brown

Published February 1, 2024 - Updated February 7, 2025

Find this PDF [here](#) and lots more Global Coup related material on my [Quasar website](#).

No-Virus Preface

It is important to recognize that humans have a tendency to believe in some things that are absorbed as part of the culture and to accept them as true, but it behooves us to sometimes stop, take a look around and lend a critical eye as to whether our beliefs are based on reality. Not having proof that something exists does not mean it doesn't exist. However, without proof, one has to be very cautious about basing action on a theory.

It is important to remember that the Germ Theory is just that - a theory. Some "germs" such as bacteria are known to exist; they can be seen and observed. However, the nature of the correlation between dis-ease and the presence of bacteria is theory. Do they cause dis-ease or is their presence because they are nature's janitors? It's an important question if one wants to get to the core of what dis-ease in the body is, where it comes from and how best to recover or maintain health in the first place.

But that is a discussion for another time. This PDF and the others in this *No-Virus Package* are concerned with another theorized "germ": the virus. Unlike bacteria, viruses cannot be observed and the evidence of their existence and the idea of spreading or catching them is mostly based on correlation; numbers of people seeming to get "sick" at the same time, exhibiting similar symptoms.

What is usually referred to as being "sick" is the body's activities where its focus is to eliminate that which it recognizes as needing to be eliminated - this is a "healing crisis". The nature and intensity of the healing crisis depends not only on what needs to be eliminated but also on the overall health and integrity of the body. Viewing dis-ease in this light is often referred to as "terrain theory".

There are many people who believe that what medical dogma characterizes as the body's response to a virus has, in reality, nothing to do with a foreign contagious particle; rather the symptoms (the dis-ease) are the body's efforts to cleanse itself.

This is hugely important for two main reasons. One is to liberate ourselves from the Bad Guy bug vs. the Good Guy drug mentality. If viruses aren't causing the dis-eases that they are claimed to, then we are led on a wild goose chase for a "cure", away from the reality of what is happening in our bodies and the consequent learning of how best to achieve health and how best to regain health when one feels unwell. And similarly, if

viruses aren't causing "outbreaks" then we must look critically to first determine if there really is an outbreak and if there is, then look for other possible causes, such as toxins and other shared environmental conditions.

And reason number two is that without the fear of contagious particles being emitted by our fellow humans and lurking everywhere, ready to wreak havoc, the State loses its most powerful tool of control over us.

Sam Bailey Videos Show Notes Preface

Sam Bailey and her husband Mark are among the many medically trained professionals who have come to adopt this no-virus, yes-terrain belief. Both have written articles and books about the subject. And since shortly after the rollout of Covid, Sam has been making videos, digging into the fallacies of virology and offering alternative explanations for being "sick".

This PDF is a catalogue of some of the videos Sam has made; these being the videos that she has characterized on her website under the heading of *Germ Theory*. The index items link to a section for each video with a link to the video on her website, Sam's intro for the video, and her References; links to sources for the video. Her videos can also be seen on her [Dr Sam Bailey Substack page](#).

Sam Bailey has also done videos that address related subjects such as the Covid response and State overreach. Those are not included here but can be found on her website or Odysee channel.

See also PDFs of mine for Show Notes of her videos in the *Viruses Unplugged* category and one for *Other No-Virus Related Videos*. These three PDF are accompanied by another source PDFs of mine on the subject, *Sources for No-Virus Articles, PDFs, Videos, Websites*. See also my [No-Virus web page](#) for new documents to come or updates to these documents.

[Koch's Postulates: Germ School Dropout](#)

September 8, 2021

What was Koch actually up to in his lab when he formulated his famous postulates?

What attempts have been made to keep [germ theory](#) alive in the modern era with techniques such as the PCR?

Let's have a look into the fraudulent science that started with Koch and continues to the current day.

[What We Weren't Taught About Gonorrhea](#)

May 17, 2022

Sexually transmitted “infections” are supposed to be irrefutable evidence of germ theory. Even some terrain theorists can be a bit uneasy talking about STIs.

So I thought I'd take on one of the most famous of them all...Gonorrhea AKA “The Clap”.

I found some eye-watering human experiments from the 1940s and analyze the spin the CDC put on the results to dial up the fear.

What We Weren't Taught About Herpes

June 2, 2022

Herpes Simplex Virus – apparently most of you have got it, even if you didn't know anything about it. But is this really true? What actually causes cold sores and genital herpes? Let's take a deep dive into the science behind these claims, including the 1920 experiments that are the basis to the whole virus transmission story.

WARNING - Images of 1920s genitalia coming up!

Stefan Lanka: "Virus, It's Time To Go."

August 12, 2022

This is a special video dedicated to the legendary Dr. Stefan Lanka.

How did the virologist come to realise that the pathogenic viruses he was chasing did not exist? We cover:

- the misunderstanding of bacteriophages
- refuting the HIV/AIDS dogma
- the €100,000 measles court case
- 7 points of how the virus story had already refuted itself

- the end of virology...

Strep A “Superbug”?

December 17, 2022

We are seeing a spate of news stories talking about so-called “superbugs” which are claimed to be invasive and deadly to humans. Some are said to be resistant to antibiotics amid speculation that these drugs may be in short supply.

Let’s have a look into the actual science surrounding Group A Strep hype! Does Group A Strep pose any threat to you or your family? Do you ever need to take antibiotics, or is there something else going on?

[Health Risks Of Using Your Cell Phone While on the Toilet](#)

March 25, 2023

Many of us know that there are [risks associated with cell phones](#). However, the mainstream generally ignores these real risks and creates [cover stories](#) to suit other agendas.

[Germ theory](#) continues to spin out of control and in the COVID-19 era it has been used to shut down the world through fear campaigns and fraudulent [mass vaccination](#). Let's have a look at one of the latest places where the 'experts' claim that germs are out to get you.

And if you are looking for a way to combat the constant contagion propaganda directed at children, stick around to the end to hear about a new solution...

[Why Pathogens Don't Exist](#)

April 29, 2023

Many of us who can see that [viruses don't exist](#), find it easier to do so as virology is an off-shoot of [germ theory](#).

If germ "theory" is wrong, there is no sense in pursuing alleged disease-causing sub-microscopic organisms. That's why the germ theorists don't want us scratching beneath the surface of the so-called '[science](#)' involving bacteria either.

Let's have a look at why the concept of "pathogens" is a complete fail on their own terms from [Koch's Postulates](#) through to some modern day animal experiments.

[TB: Cows, Lies & Koch-Ups](#)

May 13, 2023

How many times have you heard that [Robert Koch](#) proved bacteria CAUSE diseases such as Tuberculosis? The problem is that almost no one has actually read [his original scientific publications](#).

[Germ Theory](#) promoters continue to rely on shonky science and Nobel prizes to perpetuate the lies. Our colleague Michael S managed to elicit some interesting responses from the New Zealand institutions who are supposed to understand such scientific evidence.

Let's have a look at their bungled responses and the parallels with supermarionation...

[The Meningitis Mystery](#)

May 27, 2023

Meningitis is up there with [Rabies](#) and [Tetanus](#) as one of the most feared conditions. However, somewhere along the way the inflammatory condition was hijacked by [Germ Theorists](#) and has been misunderstood ever since.

Why did Neisseria Meningitidis become implicated as the cause of Bacterial Meningitis? Why is the foundational paper that claims to provide evidential proof missing in action?

We now live in a world where the true causes of Meningitis are being ignored due to this fraudulent war against [microbes](#). Let's find out what the science actually says...

The Lyme Disease Lie

June 24, 2023

When it comes to feared diseases, Lyme Disease is up there with the worst of them. However, there is a major problem with the mainstream story. The “new” disease only appeared in the 1970s with ticks and *Borrelia* “germs” subsequently being blamed soon after.

It is time to expose the scientific papers that this whole thing is based upon and point out another fundamental problem: how can this ‘disease’ possibly be diagnosed?

This is an important topic because the marketing campaigns involving ticks as the cause of a big epidemic and even as potential “bio-weapons” have already begun...

5 Spectacular Fails From Germ Theory

September 9, 2023

The [lack of scientific evidence](#) is catching up with those clinging to [germ theory](#) and [virus existence](#). We are now seeing some of the “[pathogen](#)” promoters lashing out rather than being prepared to discuss the long history of failed experiments. How much longer can they maintain this façade with their audiences?

Germ “theory” is a fraudulent misnomer as it is a refuted hypothesis rather than a scientific theory. In this video we examine five of the arguments being used by the germ proponents...and why they have all flopped spectacularly.

[The Truth About Antibiotics](#)

October 21, 2023

Antibiotics are often hailed as one of the greatest discoveries of medical science. They are credited with saving scores of soldiers in the World War II era and millions of lives since then. However, there are major problems with this story that has been promulgated by the [medical establishment](#) and the [pharmaceutical industry](#).

In this video we look into the history of penicillin and the state of the scientific evidence, including recent concerns about 'antimicrobial resistance'. Are antibiotics ever useful and why do they seem to work sometimes if there are [fatal flaws in the germ theory of disease?](#)

What We Weren't Taught About The Plague

January 20, 2024

"The Plague" or "The Black Death" was said to have wiped out half of Europe's population in the mid-1300s to earn the title as the most deadly pandemic of all time. It is claimed that the bacterium *Yersinia Pestis* caused the death of all of these people and that the disease was so infectious that being anywhere near a case could be fatal.

Many aspects of the narrative simply do not stack up, in particular the fact that [germ theory](#) and [Koch's postulates](#) have been falsified numerous times over the past century. As our Italian friends declared after their recent [interview with Dr Mark Bailey](#), these fairy tales have enslaved the world in a false paradigm of disease for generations.

Present day germ theorists have been ignoring many of the inconvenient facts including a far more detailed account of plague cases in Australia last century. In this video we examine the science behind this so-called contagious disease and why the wheels have fallen off one of the crown jewels of "pandemic" mythology.

[The Shame of Syphilis](#)

January 28, 2024

As we documented in [Virus Mania](#), the medico-pharmaceutical industry specialises in inventing epidemics that enrich and benefit a small number of beneficiaries at the expense of the general population.

The [COVID-19 Fraud](#) and other fake pandemics such as the 'Avian Flu' have been sold to the public as outbreaks of disease from imaginary viruses. However, once in a while there are attempts to resurrect an old disease that is claimed to be caused by a bacterium.

One of these is the widely-feared disease syphilis and the alleged infectious "[pathogen](#)" *Treponema pallidum*. We have seen that [Koch's postulates](#) have never been fulfilled for any microbe so how did syphilis (like [gonorrhoea](#)) become known as a sexually transmitted infection? In this video we examine the key scientific evidence, including the inconvenient mid-1900s human transmission experiments that have been swept under the carpet. We will also open up the Tuskegee Experiment files and reveal how the incident is being used to [gaslight](#) the public in the present era in order to keep them on the allopathic medical plantation.

[Can You Catch Stomach Ulcers?](#)

May 25, 2024

Since the early 1900s, the medical industry has embraced the [germ "theory"](#) paradigm even though the scientific literature has not supported the concept of [pathogens](#). With regard to stomach problems such as gastritis and ulcers it is no different and in this case the scapegoat is the bacteria *Helicobacter pylori*.

What is different this time is that we are supposed to believe that there was great resistance to the idea that one bacterium could cause stomach inflammation and even cancer. However, even before the alleged evidence was published in the medical journals in the 1980s and 1990s, 'triple therapy' started bringing in the [revenue for the pharmaceutical industry](#). Unfortunately, drugs are now celebrated as the fix rather than addressing the underlying [terrain](#) through dietary and lifestyle measures.

Join me in this video of medical mythology which involves Nobel prizes, drug patents and a major chapter in the phoney war on germs. We expose the fatal flaws in the pivotal experiment that Dr Barry Marshall performed on himself as well as the claim that [Koch's postulates](#) were fulfilled in a monkey study a few years later. There is even an unexpected link to the COVID-19 fraud and the start of [the Ivermectin Games](#).

[Is Immunity Real?](#)

June 2, 2024

The subject of immunology often appears very complicated with an ever-expanding body of literature covering cell types, immune pathways, and molecules such as antibodies. The latter is one of the mainstays of the concept of being "immune" to a disease but what is actually being measured in your blood? And while the vaccine promoters claim that the generation of antibodies is a good thing, what has actually happened to the recipient?

On other occasions, antibodies are deemed as "bad" and are used to diagnose one of the so-called "auto-immune" diseases or an invented condition such as [Alpha-gal](#)

[Syndrome](#) and [Lyme disease](#). The most feared of all is '[HIV](#)' antibodies, supposedly specific to a deadly virus...that has never been shown to exist. However, even the HIV proponents admit that the "specific" antibodies can be found in dozens of conditions, including in [recipients of experimental COVID-19 vaccines](#).

With all of the inconsistencies in the original hypotheses, it raises the foundational question of whether "immunity" is even a scientific concept? In this video we look at some of the historical aspects of immunology and why the whole thing is so crucial to the maintenance of [germ theory](#) and its beneficiaries. The good news is that we can safely ignore most of this fear-based paradigm and find a better way to health.

[Bioweapons 101: The Story of Anthrax](#)

June 8, 2024

As my husband Mark documented in "[HIV Inserts](#)", [Lies & "Lab Leaks"](#), the [COVID-19 "lab leak"](#) narrative has been in play before the World Health Organisation even officially opened the "pandemic". In recent years I have covered "[gain of function](#)" [gaslighting](#) and [garbage](#) as well as the pseudoscientific fantasies involving 'bio-weapons' [here](#) and [here](#).

In recent years most of the fear-promoting stories have related to [alleged “viruses”](#) such as [SARS-CoV-2](#) or the so-called [Avian flu](#). When dismantling these tales we go back to the foundational papers to expose the fact that there is no evidence that any [virus exists outside of computer labs](#). For many of us, we have bid [A Farewell to Virology](#) and its virus model. Additionally, because of the fatally flawed germ theory there is no evidence for the existence of microbial [pathogens](#).

However, anthrax is a curious case because it is alleged that the spores of *Bacillus anthracis* can be weaponised. In this video we examine the 2001 anthrax attacks in the United States and the alleged military facility leak with dozens of deaths in the Soviet Union in 1979. Is this nature’s only true bio-weapon or has the mixture been spiked? This was a fascinating investigation into decades of scientific work and it revealed more than a few bizarre twists…

[Toxic Shock: Bacteria vs Terrain](#)

July 27, 2024

Toxic Shock Syndrome (TSS) is a devastating condition that can lead to permanent injuries and sometimes even death. In the 1970s there was an increase in cases in the United States following the introduction of new tampon lines. Despite the clear connection of illness to the products, [germ theory](#) was invoked and bacteria were said to be the “cause”.

In this video we examine the key historical events and what some of the pivotal scientific papers actually revealed. We also consider the long-term repercussions of interfering with both menstruation and the normal function of the vagina. Additionally, new information is presented with regard to the [toxicology](#) of so-called feminine sanitary products.

Toxic shock syndrome is another example of the medical establishment claiming that our ubiquitous microbes are also [disease-causing “pathogens”](#). The [underlying terrain](#) is ignored and the [allopathic system](#) engages in a dangerous war against Nature. This presentation contains essential information for women while men will also discover important facts to understand and share with female family members, particularly those of child-bearing age.

[The Truth About Contagion](#)

August 24, 2024

When it comes to the pandemic industry there are now so many aspects of the swindle that we have written [several books](#) about it. However, when it comes to the reason as to why the public buys into productions such as [The COVID-19 Fraud](#) we believe that the pivotal reason is the belief and fear of contagion.

In this video we go back to early 2020 at the time when the [COVID-19 fairy story](#) was coming out of Wuhan. Why did the 2011 film *Contagion* suddenly become popular again during this era and how did the plot, including the [permitted "alternative" narrative](#), have so many similarities with events in recent years?

These days 'contagion' is taken to mean the transmission of illness via disease-causing germs but we have already exposed the fact that the scientific literature reveals that [pathogens do not exist](#). It is also evident that the original meanings of 'contagion' and 'infection' have been changed in order to support the [failed germ hypothesis](#). Is contagion relevant at all and why is [Daniel Roytas' new book](#) so important in this regard?

[Whooping Cough and the Vaccine Myth](#)

September 2, 2024

These days it seems not a month goes by in which we fail to hear that humanity is under attack from another “[pathogen](#)“. This is usually presented as [not-proven-to-exist “viruses”](#) such as [SARS-CoV-2](#), [Avian Flu](#) or [Monkeypox](#). However, once in a while the “germ” is said to be in the form of a known entity such as a bacterium.

Whooping cough has hit the headlines in recent weeks with the claim that new outbreaks are occurring. The fear dial is being turned up with warnings that it is [highly contagious](#) and the [unvaccinated](#) are at risk of being attacked by aerosolised Bordetella pertussis. In this video we go back to the early 1900s origin of this belief and expose the flawed scientific publications that have been used to prop up [germ theory](#) and this “infectious” disease.

The reality of the epidemiological data paints quite a picture and patently demonstrates inconsistencies with both the notion of contagion and the claimed [benefits of vaccines](#). We wrote that, “all pandemics lead to vaccines” in our most recent book [The Final Pandemic](#) and is the whooping cough story yet another example of a deceptive marketing funnel? More importantly, we must go beyond germ tunnel vision and appreciate the [real ways to achieve true health](#).

[Bursting The Germ Theory Bubble](#)

October 19, 2024

In 2020 with the onset of [The COVID-19 Fraud & War on Humanity](#) there began a series of psychological and physical assaults against populations around the world. Perhaps one of the strangest COVID rituals was governments instructing people to live in a "bubble" – that is, severely limiting their contacts to a tiny number of others. Most of the public went along with these civil rights restrictions apparently due to the erroneous belief in the notion of [contagion](#).

Although the "bubble" concept appeared new, the word was already embedded in [germ theory folklore](#) and its origins can be traced back to 1971, the year in which David Vetter was born. Claimed to be without an adequate "[immune system](#)" he became famous around the world as the "Bubble Boy". The disturbing life-long experiment that took place prompted a member of the clergy to [state](#):

"There is some evidence that David's very existence presents the specter of a virtually autonomous medical technocracy at work in our society, a technocracy that is at best only dimly aware of the subtle and delicate boundaries of the human."

– The Reverend Raymond J. Lawrence, 1985

As we wrote in both [Virus Mania](#) and [The Final Pandemic](#), the public is being bombarded with germ fear campaigns that are constantly growing in scope. While David was one boy, the impact his story had in stoking this propaganda cannot be underestimated. In this video we investigate David Vetter's life, the scientific claims involving so-called 'severe combined immunodeficiency' as well as what really killed him.

[What Killed the Native Populations?](#)

October 26, 2024

We have refuted all aspects of germ theory including an analysis of [‘the 14th century plague’](#), alleged to have been the deadliest pandemic of all time. We have concluded that while Koch’s postulates were logical and scientifically formulated, even [Koch failed to satisfy them for any microbe](#). Germ theory is a refuted hypothesis with entire books dedicated to exposing this astounding fact including [Virus Mania](#) and [The Final Pandemic](#).

We have dealt with every angle of the foundational science including [“contagion”](#), [“immunity”](#), [“antibodies”](#), [“vaccines”](#) and of course the very existence of [“viruses”](#) and [“pathogens”](#). So what could be left to maintain the belief in so-called dangerous ‘germs’? Well, there is one more question that is still being sent to us: “what about infectious diseases that devastated native populations?”…

In this video, we look into some well-known examples of Europeans travelling to the New World and the Pacific Islands in previous centuries. Populations can certainly be affected by the arrival of another culture in their region but what is the basis to the

“infectious” diseases hypothesis? Unsurprisingly, trying to derive evidence from flawed upstream science has resulted in some creative storytelling in the attempts to maintain [germ mythology](#).
