About Presidential Executive Orders, Proclamations, and other Documents

The source for these executive orders and other presidential documents is the [Federal Register website](#), where Presidential Executive Orders, Proclamations, and other Documents going back through the Clinton administration can be found.

This is a selection of Biden's executive orders that I thought held potential for finding insights into policy changes that fly under the radar; many of which are designed to advance agendas that are questionable. For example, the first entry is an executive order from September 12, 2022, in which the language paves the way for government promoted transhumanism.

Biotech, Digital, Cyber-security

[Advancing Biotechnology and Biomanufacturing Innovation for a Sustainable, Safe, and Secure American Bioeconomy](#)

For biotechnology and biomanufacturing to help us achieve our societal goals, the United States needs to invest in foundational scientific

capabilities. We need to develop genetic engineering technologies and techniques to be able to write circuitry for cells and predictably program biology in the same way in which we write software and program computers; unlock the power of biological data, including through computing tools and artificial intelligence; and advance the science of scale-up production while reducing the obstacles for commercialization so that innovative technologies and products can reach markets faster.
