Preface

Klaus Schwab of the World Economic Forum, a major player and his major global forum for corporations and individuals, announced the Fourth Industrial Revolution in May 2019, in a Brochure, [Centre for the Fourth Industrial Revolution Network for Global Technology Governance](#):

“The First Industrial Revolution introduced the use of steam power to mechanize production. The Second Industrial Revolution saw a number of groundbreaking inventions in transport, telecommunications and manufacturing, including the use of electric power to generate mass production. The Third Industrial Revolution brought the internet and other technological innovations, which have ushered humanity into the digital era.”

“Today, society is undergoing a Fourth Industrial Revolution, an age in which scientific and technological breakthroughs are disrupting industries, blurring geographical boundaries, challenging existing regulatory frameworks, and even redefining what it means to be human.”

This was followed in 2020 by his book, [COVID-19 - The Great Reset](#). From the WEF website, [Now is the time for a 'great reset'](#):

“To achieve a better outcome, the world must act jointly and swiftly to revamp all aspects of our societies and economies, from education to social contracts and working conditions. Every country, from the United States to China, must participate, and every industry, from oil and gas to tech, must be transformed. In short, we need a “Great Reset” of capitalism.”

“We can emerge from this crisis a better world, if we act quickly and jointly. The changes we have already seen in response to Covid-19 prove that a reset of our economic and social foundations is possible. This is our best chance to instigate stakeholder capitalism.”

The Global Coup, an expression I often use to describe the current events taking place since the rollout of Covid, has actually been going on for much much longer; they (the Rockefellers, the bankers, the United Nations ...) have been playing the long game. But with the rollout of Covid and Klaus Schwab's Great Reset, the Global Coup is now much more out in the open and changes towards its New Order are accelerating. This is manifest in disruptive technology, in the financial world, in media, in the field of health care (fear being the easiest way to manipulate people), in a movement to restrict basic human rights, and with every aspect of this, a massive broad comprehensive psyop.

It is important to know about the history of the globalists to really get the big picture, but, as reflected in the title of this PDF, the scope of this paper is a focus on the activities of the major players involved in the current push for a Great Reset.

Because of that focus, this PDF will not go into a deep history of the players. For example, the Rockefellers have been active megalomaniac technocrats for over a hundred years but here (excepting an occasional reference) only their recent and, in particular, Covid era actions and connections will be looked at. Also there is, of course, the deep state manipulation of global geo-politics that is a part of the Global Coup, but here the focus remains on the recent and current drive to socially engineer and entrap humanity.

This PDF will demonstrate by naming names and connecting dots to show how this Great Reset is global in nature and the endgame (which is taking place now) is total (digital) control of everyone and every aspect of life on Earth, as well as our very human natural physical lives as well.

Note, however, that this document covers only the players and projects and connections I have become aware of. There are many many more at all levels of the Global Coup and there are certainly many significant players around the world who are not listed here, but who also deserve the infamy. Follow the links to explore the depths.

Aspects of the Great Reset (and Global Coup) to Look For

Following is short list of some of the aspects of the global coup to look for in the activities or involvements of the players and the things they collaborate on:

- Public / Private partnerships; players with public responsibility with ties to corporations or big money, multinational corporations joining governments.
- Central bank digital currencies and the like, commodifying everything, including Nature itself, using finance as a weapon.
- Bio-tech, bio-weapons, including vaccines, Big Pharma, and overuse of drugs, any player or collaboration leveraging the Covid psyop.
- United Nations projects, planning how the world should run in their image, global governance, anyone or thing that describes their work as “sustainable”.
- Taking advantage of the Climate Change doom narrative, such as reorganizing society, carbon trading, policy or regulating behavior based on the narrative.
- Things such as digital ID, surveillance, data collection, needing passes for access.
- Censorship, control of speech, tailored search algorithms.
- Disruptive technology reshaping the way we live - Smart Cities, Strong Cities, 15 Minute Cities, 5G, Internet of Things, AI for everything.
- Controlling the food supply, buying up land, killing livestock because of climate and bird flu, etc.
- Social engineering, i.e. plans, projects, laws, mandates that force or compel society and individuals in a direction desirable to those who would want to control us.

The Four Parts of This Document

The document is divided into two main parts, and two lesser parts:

Part 1, *Individuals and Organizations*, is names of mostly people but some organizations. See its preface for more about this part.

Part 2, *Projects and Collaborations*, is listing of various projects playing roles in the Great Reset / Global Coup, many of them involving the collaboration of the players listed in the Part 1. See its preface for more about this part.

Part 3, *Covid's Foot Soldiers*, is players whose actions and connections may not be as global and as extensive as the players in Part 1 but who were very active in the promoting of the Covid psyop.

Part 4, *A Few More Lists of Players to Explore*, is links to more sources for researching players.

Part 1 and Part 2 each have their own table of contents, with links to sections the players and projects are divided into. Also, at the end of Part 1 is an index of its players; links to jump to their entries. Above the title of each section is the link, , that will take you back to the Master Table of Contents, from where you can navigate to anywhere else in the document. Finally, at the very end is a log of new entries for each update.

Notes on the Layout and Formatting

Each part is divided into sections (as listed in the tables of contents), loosely based on the kind of activity the player is involved in or the nature of the project. Note, however, that many of these players wear many hats; many are involved with or on the board of multiple corporations in disparate fields. It seems clear that there is a club, an in-crowd of team players who are on board with similar agendas who find their way into multiple corporations, as well as international organizations and projects.

For each entry (player, group, project, collaboration) their or its name is in a bold, red bullet point. For all of those listed with their own entry in bold red, whenever they appear anywhere else in the document their name will be in **bold** text.

Following the player's name, in indented paragraphs with a hanging 2nd line indent, like this one, the associations, activities, and such are listed.

Sometimes, not always, the first paragraph or a few are a general brief description of the player, group, or collaboration.

Some information is shown in bullet pointed lists to better show multiple players similarly related to the player or organization, for example funders or board members.

There are also links to sources interspersed for the much of the information. To avoid having the document ridiculously cluttered, those links do not include the title of the article or source; rather they simply look like this: () Following some of the linked-to sources a quote may follow, in text indented left and right.

Note that many sources are from Wikipedia, a poor source for any context but probably reasonable for an individual or corporation's general resumé, albeit limited.

As well as the interspersed () links, at the end of many player's or project's entries are some links to related information. These are of two types; one is web pages, documents, or videos *from* the player or project themselves, and the other is articles or videos *about* them from various sources. Some of these links are to information related to the listed activities and collaborations, while others are not.

Sample Player

- **Bob Player**

Multibillionaire who was instrumental in establishing central bank digital currencies in multiple countries. (🤝🤝)

Funded by the **Bill & Melinda Gates Foundation**.

Co-founded **Acme Co.** with:

- **Mary Jane**
- Joe Citizen
- **Everyman**

Has a special relationship with **Beta Corp**: (👉👉)

Practical Note: Accessing Dead or Disappeared Links

If while reading this paper, the reader chooses to follow some of the many links to articles or studies or data, and to go deeper following links on those pages, be aware that some links will be dead; the web pages having been scrubbed. A good tool to access many of those pages is the [Internet Archive Wayback Machine](#). Enter the URL that didn't work, pick a year, find a highlighted date and click on a “snapshot”. If you use Firefox, there is a [Wayback Machine Add-on](#) that makes it really easy when a dead page appears. Also note that pages on the internet archive website may open more slowly.

Text in **bold** indicates a player, or a project or collaboration that has its own individual entry. Searching that name will find their often very many connections.

Part 1 - Individuals and Organizations

Part 1 includes the players who are very globally oriented and active. It is divided into sections of people and organizations associated with a particular group or a particular type of activity. As is the case with most of the people, their activities are in many fields; thus these sections are just an attempt at organizing them a bit. The positions held by the players that are listed may or may not be current; what's important is the picture of who these people are, their connections, and the range of their activities.

Major Organizations and Foundations

Part 1 starts with 7 major player sections, each being a person, organization or foundation that is very active funding and/or collaborating on Great Reset agenda projects. For some of them, like the World Economic Forum, just some of the players or projects associated with them are listed here, but look throughout the document for these players to appear in connection with many other players, projects and collaborations.

The Bill & Melinda Gates Foundation

Bill Gates, through things he promotes, initiates, and funds is a huge player among the globalists. His entry below is very minimal; there's too much he's involved in to list. But look for his name in collaboration with and/or funding a myriad projects.

For anyone completely unaware of the breadth of Bill Gates' projects, here, in no particular order, is a short list: weather modification, genetically engineered mosquitos, Monsanto, farming, synthetic food, education, digital passes and ID, influencing media through contributions, and, of course, innumerable vaccine projects (developing them, promoting them, funding them, and vaccination programs).

For more see the About Bill Gates links at the end of his section.

- **Bill Gates, Bill & Melinda Gates Foundation**

Multibillionaire, invests in a myriad projects; leverages “philanthropy” to his advantage.

Founded **Microsoft**. ()

Created the **Bill & Melinda Gates Foundation**, a so-called philanthropy, donating to and investing in, and consequently exerting control over, a myriad projects. ()

Vaccine pusher, at the center of the Covid phenomenon.

Founded the Global Alliance for Vaccines and Immunisation, now called **Gavi, the Vaccine Alliance**.

Co-founded and funded the **Coalition for Epidemic Preparedness Innovations (CEPI)** with the **World Economic Forum** and the **Wellcome Trust**.

Is the largest donor to the **World Health Organization**.

Owns the most farmland of anyone in America.

His wealth increased by \$22 billion ($\approx 21\%$ increase) in the first year following the rollout of Covid; 9th most among the billionaires. () ()

Has donated to many media outlets as well as journalism schools.

Warren Buffett was a BMGF Trustee 2006 - 2021 (emeritus 2021).

Sue Desmond-Hellmann, former BMGF CEO is on the **Pfizer** Board of Directors.

Has attended the annual **Bilderberg Group** Conference. ()

Was a **Young Global Leader**.

- **Chris Elias**

President of Global Development at the **Bill & Melinda Gates Foundation**. ()

Board member of **Global Preparedness Monitoring Board**.

World Economic Forum

This section doesn't include the many Young Global Leaders or the myriad players associated with the WEF. Rather it is the Board of Trustees members and a few other players intimately connected to the WEF. Some of these people might be better categorized in other sections but most wear many hats; for that reason and to demonstrate the depth of the organization's influence, they are listed here.

- **Klaus Schwab**

Founder and head of the **World Economic Forum**. ()

Champions the **Fourth Industrial Revolution**.

Wrote the book, *Covid 19: The Great Reset*, which, as mentioned in the Preface, calls for resetting the world as he envisions it.

Champions “stakeholder capitalism” which positions private corporations as trustees of society: ()

“Stakeholder capitalism, a model I first proposed a half-century ago, positions private corporations as trustees of society, and is clearly the best response to today’s social and environmental challenges.”

Created the **Young Global Leader** program, initially called the Global Leaders of Tomorrow, which is essentially a school to groom people to take positions of power and influence all over the world. Note throughout this document how many prominent players were Young Global Leaders.

Created the **Global Shapers Community** program.

Is on the **Bilderberg Group** Steering Committee. () ()

Is on the Board of Directors of the Partnership for Central America.

- **World Economic Forum**

Self described on their *Our Mission* page as “the International Organization for Public-Private Cooperation”. ()

Klaus Schwab and **United Nations** Secretary-General **António Guterres** signed a partnership to: ()

“Meet the needs of the Fourth Industrial Revolution while seeking to advance global analysis, dialogue and standards for digital governance and digital inclusiveness.”

Has a “strategic foundation partnership” with the **Bill & Melinda Gates Foundation**.

Collaborates with the **World Health Organization** on the **Covid Action Platform**.

Several members of the World Economic Forum’s Board of Trustees:

- **Larry Fink**, CEO of **BlackRock**, the largest money-management firm in the world

Part 2 - Projects and Collaborations

This section has two main purposes. One is to familiarize the reader with some of the many projects, programs, plans, initiatives, and the like that are taking place all over the world, most of which have significant influence on governments and their policies, finance and trade, and on the Earth itself, but which is happening under the radar of the vast majority of the population. The second purpose is to demonstrate the intertwining of individuals, groups, foundations and the like in their collaboration in a vast and varied array of projects, most of which, by design, exploit humanity for the benefit of themselves and support the agendas of the Great Reset.

There are a myriad projects and collaborations based on Covid, on vaccines in general, and ostensibly fighting climate change; the ones found here are hopefully some of the more important ones. Look for protecting health by vaccinating and by digitizing and/or surveillance and fighting climate change being used as excuses for many activities.

Also the need to achieve the United Nations' SDGs, the 17 Sustainable Development Goals, are used endlessly as excuse for action or as the premise for entire projects. Look for the word "sustainable" to be worked into descriptions for everything; it's meant to signal that they care, but is a signal that they either promote the globalist agendas or buy into the psyop; there's nothing about most of these projects that are truly sustainable.

For many of the collaborations there are lists of funders and/or partners. Listed are mostly players who have their own entry in this document, plus sometimes a few other people or corporations that are well known. There are often many more funders or partners than those listed; check the source links to see more.

United Nations Agencies and Projects

Much of what the United Nations is into today spins off of a number of decisions made and projects initiated in 1992 at the *United Nations Conference on Environment and Development*, also known as the Rio de Janeiro Conference or the Earth Summit.

In order to maintain the relatively narrow focus of this document, It is left to the reader to learn more about that on their own. Following are several links to explore:

- From the United Nations:

• United Nations

The United Nations is probably the global entity that is most familiar to people, and by most people is probably viewed in a fairly good light. Its raison d'être, ostensibly, is to be a place where the countries of the world can come together and take efforts to resolve conflict and work out differences.

However, it has from its inception been a place for globalists such as the Rockefellers to work towards a central governing body of the world. The expression, "Global Governance", is these days used openly and unapologetically as something needed to manage the difficult issues of the world. And the UN has a myriad programs oriented towards shaping the world as they see fit.

- From the United Nations:

[Our Common Agenda - Report of the Secretary-General](#)

• Sustainable Development Goals

At the 1992 Rio Conference, Agenda 21 and the idea of "Sustainable Development" were born. At the United Nations' Millennium Summit in 2000 the Millennium Development Goals came into being. Agenda 21 evolved into Agenda 2030 and the 8 MDGs evolved into the 17 SDGs, which are a set of goals laid out by the United Nations that they believe the whole world should be taking efforts to accomplish by the year 2030.

The goals sound beautiful and idyllic on the surface (as they are intended to) but are completely unrealistic as they would only be accomplishable by a kind of unity between

nations and individuals which is in no way fostered by the United Nations or the governments of the world.

Instead the push for the achievement of these goals uses the gravity of the need to accomplish them as excuse for the exercising of global governance and networks of willing players imposing legislation and projects on the populous of the world, without their consent; in most cases without people even knowing that SDGs exist, or if they do, not being educated as to what they are, and the relevance of the projects to reality.

Media Alliances, Fact-Checkers

In reading through the websites of the legacy media organizations, who are in bed with the usual suspects, it is made apparent that they not only partner with billionaire corporations such as Google and Meta, but they boast that their journalism and fact-checking meets the standards of those organizations as well as other "experts". However, those organizations and "experts" themselves are, of course, never vetted or critiqued.

• **Our World in Data**

British organization, affiliated with the University of Oxford, that played a major role in furthering the Covid narrative, pumping out terrifying daily statistics of Covid deaths, supporting the almost every death is a Covid death scam. () ()

For several years during the pandemic, our team at Our World in Data published daily updates on a range of crucial indicators and developed two global datasets on testing and vaccination. Our COVID-19 Data Explorer became a go-to source for people to understand the extent and spread of the disease.

Climate Change

The climate change doom narrative has become a scam of epic proportions. It is used to justify social engineering through 15 minute cities and other artificial urban policies. It legitimizes surveillance, both visually and digitally, tracking people's "carbon" footprints. It has given rise to extremely lucrative markets that trade in carbon credits and sequestering carbon. It is even claimed to be responsible for more active viruses. It is said to be the cause of the widespread migration crises.

It's a lie and it's a tool of the globalists to give them more money and more control. While many involved in efforts to deal with climate change are probably well meaning, many organizations know full well that they are manipulating people. The reader can decide for themselves whether the people involved in fighting climate change are knowingly manipulating people, just jumping on the bandwagon for the money, or really believe the doom scenario and are well meaning, if uninformed.

This section, however, features projects involving big money and lots of the globalist players; people who most likely fit in the manipulating category.

Food and Agriculture

Part of the Great Reset's global agenda is controlling all aspects of agriculture and food. Using the climate change doom scenario as an excuse, synthetic and insect based food is being pushed. Fictitious virus outbreaks are being used as excuses to kill cattle and chickens. Bill Gates owns more agricultural land in the United States than anyone else. This section will look at the projects and companies related to the future of food.

- **Alliance for a Green Revolution in Africa (AGRA)**

African agriculture organization: ()

“Established in 2006. African-led, African based institution transforming smallholder agriculture from a solitary struggle to survive into farming as a business that thrives.”

Part 3 - Covid's Foot Soldiers

This part is players whose actions and connections may not be as global and as extensive as the players in Part 1 but who were very active in the promoting of the Covid myth, the vaccines, and the fear, and/or were responsible for the lockdowns, masks, mandates, and the rest of the stripping away of basic human rights that we endured during 2020 & 2021.

Some were undoubtedly aware of the psyop and aware of the damage that was being done, while others may have been innocent of the bigger picture but were caught up in the fervor that gave permission for their inner fascist to come out in how they used their power and influence. Their connections may hint at which category they fit into.

- **Michael Ryan**

Executive director of the **World Health Organization's** Health Emergencies Programme.

Co-wrote the foreword for the 2023 WHO document, Defining Collaborative Surveillance. ()

Participated in the **Catastrophic Contagion** tabletop exercise hosted by **Johns Hopkins**.

Participated in the **Strengthening Global Systems to Prevent and Respond to High-Consequence Biological Threats** monkeypox related tabletop exercise sponsored by Ted Turner's Nuclear Threat Initiative.

During Covid, advocated going into families and removing “people who may be sick”:

“Now we need to go and look in families and find those people who may be sick and remove them and isolate them in a safe and dignified manner.”

- From Michael Ryan:

Led the WHO-China Joint Mission on Coronavirus Disease 2019 (COVID-19): ()

“In the face of a previously unknown disease, China has taken one of the most ancient approaches for infectious disease control and rolled out probably the most ambitious, and I would say, agile and aggressive disease containment effort in history.”

- **Kate Gilmore**

United Nations Deputy High Commissioner for Human Rights.

Speaking about vaccinations she made it clear that she has no idea what “human rights” means, nor what “free” means:

“People must be at the centre of healthcare and their free and equal rights to essential healthcare services such as vaccinations must be observed throughout their life-course, without discrimination.”

“There is no such thing as a right to refuse vaccines when the consequences of doing so is to be borne by others and undermine the rights of others to health, as recognized in the International Human Rights Framework.”

Update Log - New Entries by Update

This document will be updated as more players of import cross my radar. This log should be helpful to anyone who has downloaded this reference in the past and now downloads an updated version. By looking here one can see what has been added since any previous version.

Only new entries will be noted here; not the cross referencing of them with other players and projects, but a search should reveal those.
